EDUCATION

Rajiv Gandhi Institute Of Technology — Mumbai, Maharashtra
BE in Information Technology — 2024-2027

Government Polytechnic Mumbai — Mumbai, Maharashtra
Diploma in Information Technology – 88.75% — 2021 - 2024

WORK EXPERIENCE

Software Development Intern (React Native Developer)**:** — **Mumbai, Maharashtra**
Fi Havock Digital Private Limited — Jan 2024 – June 2024

- Managed the full development lifecycle to publish 4+ mobile applications on the Google Play Store, delivering scalable solutions with optimized front-end user interfaces and high user engagement.
- Improved app responsiveness by optimizing API response handling and reducing screen load time.
- **Integrated Redux for state management**, improving app performance and streamlining authentication flows.
- Integrated **2 payment gateways in testing/sandbox mode**, enabling secure transaction workflows during development.
- Integrated and maintained **40+** APIs spanning data retrieval, authentication, and external services, improving overall app functionality and user experience.

PROJECTS

NourishNet – *MongoDB, Express.js, React.js, Node.js* | Live | Github

Built a platform that connects restaurants and individual donors with NGOs to reduce food waste and support timely food distribution.

- Implemented two dedicated roles to manage operations:
  Donors for posting details of surplus food.
  NGOs for claiming available food requests and coordinating pickups.
- Created separate **Donor and NGO Portals** for posting food, claiming requests, and viewing active and completed donations.
- Built an **AI-powered chatbot** that reduced reliance on manual customer support by instantly answering donor and NGO questions from a built-in knowledge base.

TalentAI – React.js, Node.js, Express.js, FastAPI, PostgreSQL, LLM APIs, Embeddings

Built a hiring platform that reads resumes, matches them to job requirements, and shows recruiters why a candidate was accepted or rejected.

- Developed a **layout-aware resume parser** in FastAPI using LLM structured outputs and Pydantic validation, with integrity scoring to prevent low-quality data.
- Designed a **weighted matching engine** combining skill overlap, experience fit, education and **embedding-based cosine similarity** to rank candidates and auto-reject below a configurable threshold.
- Implemented **skill gap analysis** with stored rejection reasons and automated feedback emails to candidates.

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript, HTML/CSS, TypeScript
Technologies /Framework: React.js, Next.js, React Native, Tailwind CSS, Bootstrap, Fast API, REST APIs, Node.js, Express.js
Databases: MongoDB, MySQL, PostgreSQL, Drizzle (ORM)
Tools and Platforms: VS code, Postman, Git, Github
AI /ML: LLM APIs, Embeddings, Semantic Similarity (Cosine), NumPy.
